28 August 1951

25X1A

MEMORANDUM FOR: [REDACTED]

FROM: Mr. James Q. Reber

SUBJECT: Intelligence Coordination

1. I am enclosing the notes on intelligence coordination which you requested on 27 August.

2. We have carefully gone over Section III of your "Notes as a Basis for Discussion" and feel that in general they should stand as the basis for your forthcoming remarks since they clearly present the theory of intelligence coordination as CIA has been practicing it.

3. I suggest, however, that you drop the paragraph on page 9 beginning "For example..." since the theoretical illustrations which it provides can now be replaced by a number of examples drawn largely from the experience of the past year. The attached material might be used for that purpose.

JAMES Q. REBER
Assistant Director
Office of Intelligence Coordination
